

THE IMPORTANCE OF FAMILY AND FRIENDS

Family and friends are very important to me. I live with my parents and my younger sister in a cozy house. We often spend time together at the weekends to relax. My mother likes to cook delicious meals while my father usually helps me with my homework. My sister and I enjoy playing board games in the living room. Besides my family, I have a close friend named Minh. We have a lot in common, such as playing football and listening to music. Whenever I feel sad, he is always there for me to listen and give advice. I feel very lucky to have such wonderful people in my life. They help me stay positive and happy every day.
